
Technical Visit to Science and Technology Park

Date: 12nd December 2009

Location: Hong Kong Science and Technology Park

Type: Technical visits

To start off, we visited the IC Development Center that shows a lot of IC products, USB, mobile phones and some electric components, etc. students learned the IC development process and the history of IC. Afterwards, students visited the Hong Kong RFID Center. It gave an introduction on RFID functions and purposes. Students understood how RFID is used in different fields. Also, in the Photonics Center, students had an introduction on LED technology, including LED architecture, history and LED purposes.
