
Technical Visit to Googol Technology (Shenzhen) Limited

Date: 15th September 2012

Location: Shenzhen Hi-Tech Industrial Park

Type: Technical visits

This company is the largest motion controllers and robotics provider in China. And guided by staff members of the Engineering Sciences Team of the School of Science and Technology, participants visited the company's motion control lab, research institute, and factory. Students were shown automation facilities and demonstrations of the company's latest research and development achievements. Students were briefed on the history and latest trends of robotics, and also participated in a discussion with the company's senior management. The event was very well received with an enjoyable time of idea exchange and learning.
