
Technical Seminar on Assistive Technologies for the Visually Impaired

Date: 7th October 2013

Location: OUHK Main Campus- C0821

Type: Technical Seminars

We were honor to invite the representative from the Hong Kong Blind Union to give us a talk about the I.T. devices or services which can help the blind to live more conveniently, such as the government-funded mobile apps called “芝麻開路”, which were made by the Hong Kong Blind Union and it is a modified map apps that can help the blind to locate the position they want to go in the indoor areas. Also, our students had signed for a year-long volunteer work to help maintain the data base of the mobile apps “芝麻開路”.
