Technical Visit to Hong Kong Science Park

Date: 27th November 2018
Location: Hong Kong Science Park, Shatin
Type: Technical visit

A group of 40 full-time students from electronic and computer engineering and I.T. visited the Hong Kong Science Park on 27 November 2018. Led by HKSTP staff, the group had a tour to the Data Studio, which is a convenient collaboration environment for co-creating data applications between the business sector and developer community. Then talks were given by Mr. Barry Leung, Founder and Director of Lambda Sense Limited, and Mr. Kelvin Wan, founder and Managing Director of BCONDUIT. In the talks, the students were introduced to various AI and big data applications in various sectors, as well as insights in starting companies in the Science Park.
