

Technical Visit to CLP ElectriCity & Power Station

Date: 2nd February 2018

Location: Castle Peak Power Station

Type: Technical visits

The visit started with a guided tour to ElectriCity, which was a special venue entirely conceived and created by CLP. It featured interesting and informative displays that explained the fundamental principles of electricity, power generation, transmission and distribution, with reference to the fuel sources currently used in Hong Kong. Afterward, CLP staff led a guided bus tour to visit various sites in Castle Peak “A” and “B” stations.
