Master of Engineering in Engineering Management

Programme Aims
The programme is intended for engineering graduates to upgrade their management skills for application in an engineering organization. It enables graduates to strengthen their academic profiles for career advancement or to fulfill CPD requirements of professional bodies. Students are equipped with comprehensive knowledge to manage an engineering organization, and to deploy technology to an engineering project. Graduates are expected to progress in career as a technical manager.

Courses Highlights
- ENGGS826F Engineering Management, Engineering Project Management & Development
- ENGGS837F Systems Engineering
- ENGGS838F Innovation & Technology Management
- ENGGS801F Engineering Management Project
- ENVRS890F Energy Management & Audits
- ENVRS892F Environmental Engineering & Design
- ENGGS851F Construction Economics
- ENGGS852F Building Planning & Construction
- ENGGS853F Building Services Management

Programme Characteristics
Part-time face-to-face, nominal 2 years (lectures, workshops, field visits, laboratories, site surveys, seminars, dissertation)

Admission Requirements
A degree in Engineering or equivalent; or a degree in a non-Engineering discipline with at least 3 years of engineering working experience.

Application Open
Students may also enroll in individual courses without registering for the Master’s degree.

Holders of recognized postgraduate qualifications may be granted exemptions of up to 20 credits.
